DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "408" has been used to designate both transistor and row line. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuda et al., 5,448,421, in view of Zhu et al., 6,391,483.

Matsuda et al., 5,448,421, discloses in Fig. 3 a system comprising :
magnetic memory 2a ;

probe electrode 10;

display computer 16.

What is not shown in Matsuda et al., 5,448,421, is the soft-reference magnetic memory cell.

Zhu et al., 6,391,483, discloses in Fig. 33 a magnetic memory cell comprising:
anti-ferromagnetic layer 74;
intermediate layer 32;
soft magnetic layer 30;
refresh operation (see line 43, column 14).

It would have been obvious under 35 USC 103(a) to one of ordinary skill in the art at the time of the invention was made to utilize the magnetic memory cell in Fig. 33 of Zhu et al., 6,391,483, for the magnetic memory cell in Fig. 3 of Matsuda et al., 5,448,421, for the purpose of reliability (see lines 50-55, column 1 of Zhu et al., 6,391,483).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Nishimura, 6,104,632, Tran et al., 6,538,917, Sharma, 6,819,587, Sharma et al., 6,538,920, Furno et al., 4,816,813.
